**Gartner lists Vietnam as one of 6 primary locations of Global Delivery Country Destinations in the APAC Region**

Gartner Inc. has announced the report: "Evaluate Offshore/Nearshore Countries for Outsourcing, Shared service and Captives in Asia/ Pacific, 2016", published February 2016, in which Vietnam is one of 6 primary locations of Global Delivery Country Destinations in the APAC Region. 5 other countries are China, India, Malaysia, Philippines and Sri Lanka.

Mr. Le Thai Hy, Director of Department of Information and Communications of Ho Chi Minh City, said: "Although Vietnam has been named as a primary location, among China, India, Malaysia, Philippines and Sri Lanka, we believe we still have a lot of issues that need to be resolved. In the following stage, Vietnam government will implement a lot of strategies and policies to develop the telecoms infrastructure, IT human resources and incentives mechanisms to attract investment. In March 2016, the government has approved the decision to found Quang Trung Software City chain, therefore connect Vietnam IT zones, gather the capacity of all resources to attract investment, create a solid backbone to develop IT sector."

Mr. Lam Nguyen Hai Long, President of VNITO Alliance, shared his opinions: "This is good news for Vietnam when being listed among the other countries in the primary locations category but it will be a big challenge for us to keep it up. VNITO Alliance will try to connect Vietnam ITO community, create a bridge between software outsourcing enterprises and the government, promote Vietnam ITO brand widespread to the world".
